

AGRICULTURAL MULCH

DIVISION

Grupo Ortiz agricultural mulch is an advanced technical solution designed to optimize agricultural production. It acts as a protective barrier that maximizes resource utilization and protects the crop.

Crop Optimization

Our films allow for efficient weed control, conserve soil moisture by reducing irrigation, and regulate thermal temperature, resulting in increased productivity and harvest quality.

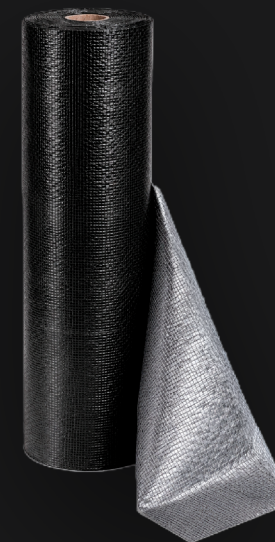

Products:

- AGRICULTURAL MULCH

2026

AGRICULTURAL MULCH

High-tech plastic film available in different configurations (Black/Black, Silver/Black, White/Black) to adapt to the specific needs of each crop and climate. It guarantees full weed control and optimization of water resources.

| CHARACTERISTICS | MEASUREMENT | | TOLERANCES | UNIT | TEST METHOD |
|-----------------|-------------|---------|------------|------------------|-------------|
| | MINIMUM | MAXIMUM | | | |
| Width | 0.60 | 1.5 | ±0.02 | m | — |
| Thickness | 63 | 100 | ±5% | g/m ² | — |
| Length | 500 | 2000 | ±2% | m | — |
| UV Protection | 12 | 36 | | meses | — |
| Opacity | 99.9 | 100 | | % | — |
