

NATURIZABLE

DIVISION

The Naturizable line by Grupo Ortiz represents the forefront of sustainable packaging, developed from plant-based polymers. It is our technical response for a circular economy and a lower carbon footprint.

Sustainable Innovation

Designed to maintain the technical performance of conventional materials, our naturizable products offer a compostable or bio-based alternative that minimizes environmental impact without compromising functionality.

Products:

- CHAROLA 855
- CELLULOSE CUP
- CONTAINERS

2026

CHAROLA 855

Packaging that holds food with dignity. It serves the taquero, the butcher, the greengrocer, the chef — and when it's done, it returns to the earth without asking permission. We sustain the world. One tray at a time.

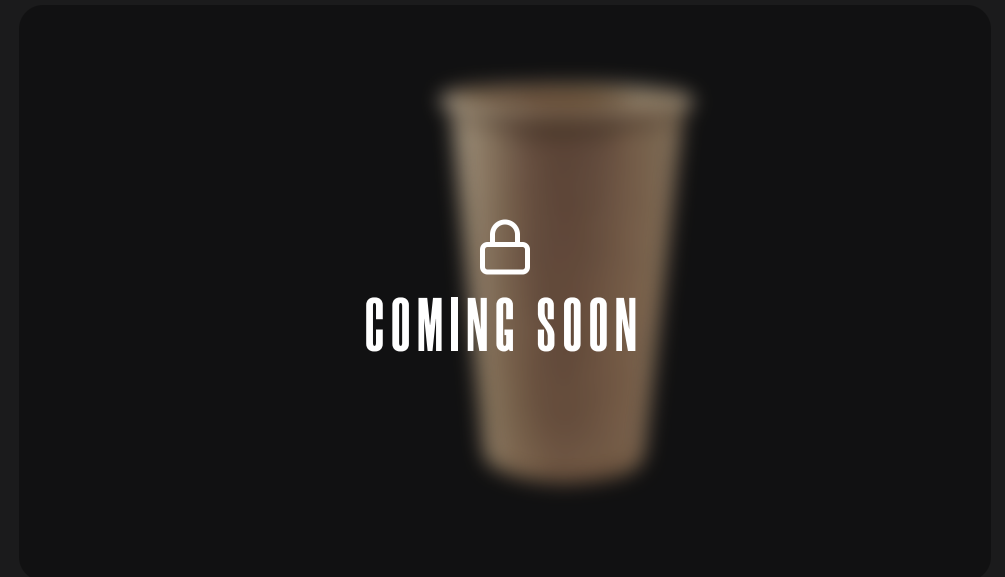

Material	Usage	Resistance	Presentation
Kraft Cardboard	Food	Greaseproof	Eco-friendly

CELLULOSE CUP

High-quality biodegradable cellulose cups. A sustainable and elegant solution for beverage service, committed to the environment without compromising functionality.

This product will be available soon.

CONTAINERS

Specialized containers for various industrial and commercial applications. Designed for maximum durability and efficiency in storage and transport.

This product will be available soon.
